Plantaže

VINA KOJIMA SE VJERUJE

Kompanija "13. jul Plantaže" predstavlja jednog od najvećih i najznačajnijih proizvođača grožđa, vina i lozove rakije u Jugoistočnoj Evropi. "Plantaže" danas gazduju vinogradom površine 2.310 hektara, sa tri vinska podruma kapaciteta 310.000 hl, zatim sa 40 hektara matičnjaka loznih podloga, plantažom breskvi na 85 hektara, ribnjakom u kome se godišnje proizvede 100 tona kalifornijske pastrmke, kao i sa različitim maloprodajnim i ugostiteljskim objektima. Poslujući po međunarodnim standardima kvaliteta ISO 9001, 14001, 22000 i HACCP, "Plantaže" godišnje proizvode oko 22 miliona kilograma grožđa, plasirajući više od 17 miliona flaširanih proizvoda, i oko 2.000 tona stonog grožđa, u više od 35 zemalja svijeta.

Vina "Plantaže" osvojila su više od 800 nagrada na ocjenjivanjima, takmičenjima i sajmovima širom svijeta. "Plantaže" su danas jedna od najuspješnijih crnogorskih kompanija uopšte, a njenih 661 zapoštenih njeguje, ne samo poluvječkovnu tradiciju "Plantaže", već i hiljadugodišnju crnogorskiju tradiciju vinogradarstva i vinarstva, najveću pažnju posvećujući upravo crnogorskim autohtonim sortama vinove loze i autentičnom crnogorskom vnu u kome se ogleda crnogorska kultura i duh jednog zaista jedinstvenog vinogradarsko-vinarskog podneblja.

TAJNA ĆEMOVSKOG POLJA

Vinograd Ćemovsko polje nalazi se jugoistočno od Podgorice, između rijeke Morače i Čijevne. Zauzima površinu od 2.310 ha što ga čini najvećim evropskim vinogradom u jednom kompleksu sa više od 11,5 miliona čokota vinove loze. Leži na platou čija nadmorska visina varira između svega 45 i 70 metara. Ovičen je vijencem golih krečnjačkih brda, što ga određuje kao krašku kotlinu sa izrazito žarkim i suvim ljetom i zimom tek nešto hladnijom nego u primorskom pojusu. Količina padavina iznosi samo oko 1.600 ml vodenog taloga mjesečno. Izuzetno male količine padavina i ogroman broj sunčanih sati, upotpunjuju sliku ovog podneblja koje možete zamisliti u bojama i zvucima vrelog ljeta.

Drugi izazov sa kojim se suočava vinova loza je zemljiste, teško i skeletno, sačinjeno od krednog krečnjaka, prošaranog pijeskom i šljunkom, sa mnoštvom uglačanih oblutaka. U toj epskoj borbi vinove loze i kamena nastaju naša autentična vina, jedinstvenog, bogatog bukea, svjedočeći o posebnosti vinograda u kojem se rađaju.

SNAGA PODNEBLJA

Vina "Plantaže" svjedoče o jedinstvenom crnogorskom podneblju, smještenom između Jadranskog mora, Skadarskog jezera i visokih planina u zaleđu, koje stvara uslove za rađanje autentičnih, raskošnih vina jedinstvenog karaktera. Crnogorski vinogradarski reon, šire posmatrano, smješten je na najjužnijem dijelu jadranske obale, pa blizina mora u najvećoj mjeri određuje mikroklimu Ćemovskog polja. Uticaj jadranske klime prostire se širokom dolinom rijeke Bojane sve do Podgorice u čijoj blizini se i nalaze naši vinograđi. Mi vjerujemo da su vina "djeca podneblja" i da karakter i kvalitet vina potiču direktno iz samog vinograda i zato smo posvećeni proizvodnji vina koja su u mogućnosti da u potpunosti izraze svoje porijeklo. Zato, sve što radimo i u vinogradima i u podrumima, radimo sa velikim poštovanjem prema sopstvenoj zemlji, prema sopstvenom vinogradu i grožđu koje se u njemu rađa. I upravo zato uspijevamo da više od pedeset godina proizvodimo najbolja crnogorska vina – vina posebnog karaktera, sa snažnim pečatom našeg podneblja.

Plantaže

CRNOGORSKE AUTOHTONE SORTE

Blagodareći izvanrednom podneblju, sastavu tla i povoljnom položaju, u vinogradima "Plantaža" se uspješno gaje autohtone crnogorske sorte vinove loze – vranac i krstač, ali i svjetski poznate sorte kao što su šardone, sovinjon blan, kaberne sovinjon, merlo, negro amaro, marselan, peti verdo i dr. Vranac je drevna crnogorska sorta i njeno pravo porijeklo je skriveno u dubinama istorije. Vranac je knjaz veličanstvene knjaževine vina u Ćemovskom polju. On je naš vinogradarski i nacionalni ponos i, u skladu s tim, zauzima čak 70% vinograda.

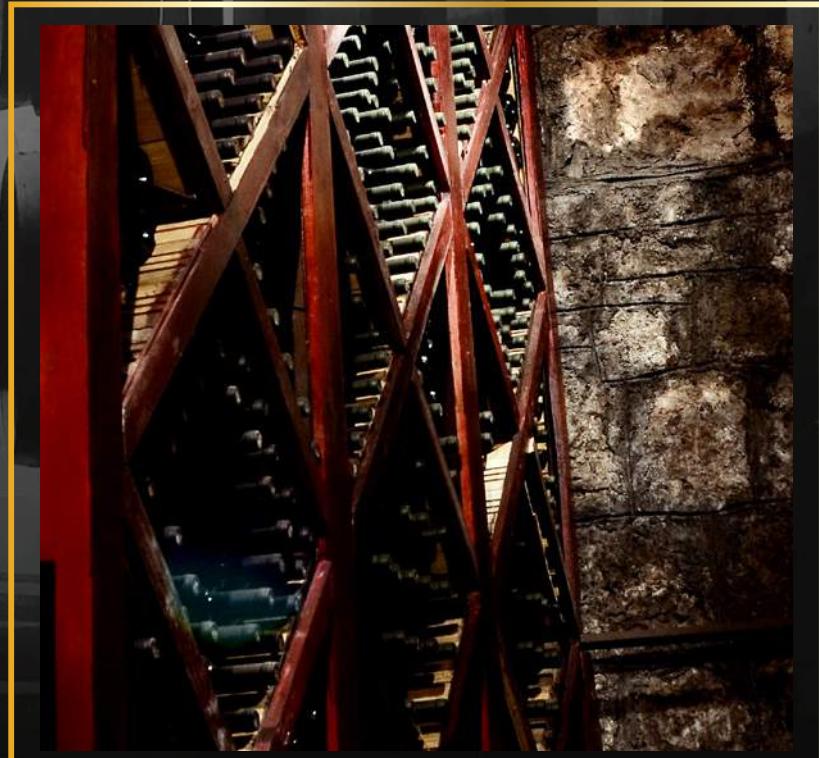

Krstač se na Ćemovskom polju uzgaja na mikrolokalitetu "Nikolj Crkva", a svi pokušaji da se prenese u druga svjetska područja bili su bezuspješni. Grozd je srednje velik, zbijen i podsjeća oblikom na krst po čemu je i dobio ime. "Plantaže" su jedina vinarija na svijetu koja gaji krstač i od njega proizvodi istoimeno vino.

RIZNICE VINA

Osnovna proizvodnja vina se odvija u podrumu "Ćemovsko polje", sa najsvremenijom opremom i uz primjenu najnovijih tehnoloških dostignuća. Najstariji podrum – "Lješkopolje", pretvoren je u podrum za odležavanje specijalnih serija vina, kao i za eksperimentalne vinifikacije. Stari vojni aerodrom pretvoren je 2007. godine u impresivnu riznicu vina, velelepni podrum „Šipčanik“, po principu francuskih šatoa, jer je smješten usred vinograda, u istoj zemlji, u istom kamenu, iz kojeg se loza rađa. Podrum se nalazi na prosječnoj dubini većoj od 30 metara ispod zemlje. U obliku je zavojitog tunela, dugog 356 metara, prosječne širine 13,5 i visine 7 metara. Temperatura je gotovo konstantna – između 17 i 19 stepeni. Vlažnost – 70 do 80%.

U impresivnom prostoru, na 7.000 metara kvadratnih, vino se u drvenim sudovima njeguje u idealnim klimatskim i tehnološkim uslovima. U drvenim buradima odležava i stari dva miliona litara vina.

CLASSIC WINE

CRNOGORSKI KRSTAČ

VRHUNSKO SUVO BIJELO VINO

KARAKTERISTIKE: Krstač je autohtona crnogorska bijela sorta za proizvodnju vina. Od izabranog gržđa dobija se autentično bijelo vino izuzetne svježine na prelazu od mediteranskog ka kontinentalnom tipu. Sjajno zlatno žute boje sa zelenkastim odsjajem. Lako, pitko, svježe i skladno vino, sa karakterističnim sortnim aromama breskve, kruške i mediteranskog začinskog bilja, uz mineralne note u završnici ukusa.

PROCENAT ALKOHOLA: 13.11 % Vol.

TEMPERATURA SERVIRANJA: 10°C

UZ HRANU: Predjela od ribe i plodova mora, lagane čorbe, morska i rječna riba, bijela mesa sa manje začina, meki bijeli sirevi. Dobre rashlađen – Krstač predstavlja idealan aperitiv.

PAKOVANJE: 0,75l

MONTENEGRIN KRSTAČ

CLASSIC DRY WHITE WINE

Characteristics: Krstač is the autochthonous Montenegrin white variety for wine production. It is the selected grapes that the authentic white wine of exquisite freshness is made, at the transition of the Mediterranean to continental type. It is light yellow color with greenish reflection. Light, potable, crisp and harmonious wine, with the characteristic varietal flavors of peach, pear and Mediterranean spice herbs, with mineral notes in the aftertaste.

Alcohol content: 13.11% Vol.

Serving temperature: 10 °C

Matching with food: Fish and seafood appetizers, light chowders, sea and river fish, less spicy white meat, soft white cheese. When cooled – Krstač is ideal as an aperitif.

PACKAGING: 0,75l

CRNOGORSKI CHARDONNAY

VRHUNSKO SUVO BIJELO VINO

KARAKTERISTIKE: Na osunčanom kamenitom zemljištu Čemovskog polja, šardone daje autentičnu, bogatu, ekstraktivnu vina, sa obiljem svježih voćnih mirisa i ukusa. Buke je prepoznatljiv po svježim voćnim aromama zelene jabuke i ananasa. Crnogorski Chardonnay pripada tipu suvog, punog vina, mekog ukusa, sa lijepim, citrusnim završetkom.

PROCENAT ALKOHOLA: 13.8 % Vol.

PACKAGING: 0,75l

CRNOGORSKI ROSE

VRHUNSKO SUVO ROZE VINO

KARAKTERISTIKE: Lepršavo i elegantno suvo vino, ružičaste boje. Dobijeno je od grožđa crnih vinskih sorti vinove loze vranac i grenacha koje se gaje na Čemovskom polju, tehnološkim postupkom koji se primjenjuje u proizvodnji bijelih vina. Intenzivnog je mirisa maline, ribizle i divlje ruže. UKUS je mješavina harmoničan. Kiseline su blage, voćne i prijatne svježine.

PROCENAT ALKOHOLA: 12.5 % Vol.

TEMPERATURA SERVIRANJA: 8-10°C

UZ HRANU: Rose je idealan aperitiv, ali i odličan pratilac raznih prljavičnih i ljetnjih laganih salata, pašteta od ribe, súvog mesa. Izvrstan je uz jela sa roštilja.

PAKOVANJE: 0,75l

MONTENEGRIN ROSE

CLASSIC DRY ROSE WINE

Characteristics: Vivacious and elegant dry wine of pink color. It is made of red wine varieties Vranac and Grenache, grown in Čemovsko polje, by technological procedure, applied in white wines production. Intense aromas of raspberry, blackcurrant and wild rose. Its taste is soft and harmonious. Mild and fruity acids leave the impression of pleasant crispness.

Alcohol content: 12.5% Vol.

Serving temperature: 8-10 °C

Matching with food: Rose is an ideal aperitif, but it goes well with light spring and summer salads, fish pates, smoked meat. It goes very well with barbecue dishes.

PACKAGING: 0,75l

CRNOGORSKI VRANAC

VRHUNSKO SUVO CRVENO VINO

KARAKTERISTIKE: Vranac je drevna autohtona crnogorska sorta. Kompanija 13 jul Plantaže je prepoznatljiva upravo po proizvodnji klasičnog sortnog Vranca, kontrolisanog porijekla i kvaliteta. Ovo moćno, snažno vino juga je intenzivne rubin boje, sa nijansama ljubičaste. Na mirisu i ukusu podsjeća na zrele višnje, tamno šumsko voće i suve šljive, sa slatkim začinskim tonovima koji ostavljaju naknadni ukus punoće i topline.

PROCENAT ALKOHOLA: 13.6 % Vol.

TEMPERATURA SERVIRANJA: 16-18°C

UZ HRANU: Crvena mesa, divljač, začinjena jela, masni zreli sirevi. U Crnoj Gori se piće uz njeguški pršut, jela od morske i jezerske ribe, kao i uz sve vrste pečenja i jela sa roštilja.

PAKOVANJE: 0,75l

MONTENEGRIN VRANAC

CLASSIC DRY RED WINE

Characteristics: Vranac is an ancient autochthonous Montenegrin variety. Company 13 jul Plantaže is recognizable because of production of classic variety Vranac, controlled origin and quality. This is powerful, strong southern wine with intense ruby color, with purple hues. Its aromas and flavours reminds of ripe sour cherries, dark forest fruit and dried plums, with sweet herbs notes, leaving good mouthfeel and warmth in the aftertaste.

Alcohol content: 13.6 % Vol.

Serving temperature: 16-18 °C

Matching with food: Red meat, game meat, spicy dishes, fat, hard cheeses. In Montenegro, it is consumed with prosciutto from Njeguši, and with sea and lake dishes, as well as with all types of roast meat and barbecue dishes.

PACKAGING: 0,75l

CRNOGORSKI CABERNET

VRHUNSKO SUVO CRVENO VINO

KARAKTERISTIKE: Na Čemovskom polju sorta kabeme sovinjan, uz mali procenat vranca kao prateće sorte – daje vrhunsko suvo vino Crnogorski Cabernet. Ovo je moćno vino juga, koje u sebi spaja raskošnu snagu kaberneta i autentične osobine vranca, kao i samog teroara. Tamno crvene boje sa aromama koje podsjećaju na ljubičice, kupine i borovnice, sa diskretnim tonovima biberna. UKUS je veoma bogat i harmoničan.

PROCENAT ALKOHOLA: 13.89 % Vol.

CLASSIC DRY RED WINE

Characteristics: Famous French variety preserved its best characteristics in Podgorica's viticultural area, manifested in a connection of Mediterranean and continental climate. It is strong, full-bodied wine, elegant with the balance of spicy and fruity plum and black currant notes with pleasant smells of rose in traces.

Alcohol content: 14.4 % Vol.

Serving temperature: 16 -18 °C

Matching with food: It goes well with not too spicy red and white meats, and with poppy and walnut cakes.

PACKAGING: 0,75l

VRANAC PRO CORDE

VRHUNSKO SUVO CRVENO VINO

KARAKTERISTIKE: U prozvodnji vina Vranac Pro Corde sprovodi se tradicionalna maceracija i vinifikacija, ali uz poseban tehnološki postupak, kojim je u vino povećan sadržaj proantocijanida, prirodnih sastojaka grožđa, koji imaju moć da vezuju slobodne radikale i blagotvorno deluju na ljudski organizam. Tamno crvene boje. Izuzetno, puno i snažno vino. Izraženi su mirisi crnog bobićastog voća, poput kupina i borovnica, sa tonovima trešanja, suvog začinskog bilja i kafe.

PROCENAT ALKOHOLA: 14.10 % Vol.

TEMPERATURA SERVIRANJA: 16-18°C

UZ HRANU: Bifteci, jagjetina, divljač, pečena guska ili pačetina. Odlican je i u kombinaciji sa začinjenim gulašima, a izvrsno se slaže sa grilovanom tunom i sa zrelim tvrdim sivremima.

PAKOVANJE: 0,75l

VRANAC PRO CORDE

CLASSIC DRY RED WINE

Characteristics: In the production of Vranac Pro Corde, a traditional maceration and vinification have been done by a specific technological process, by which the contents of proanthocyanidols, the natural ingredients of grapes which have power to bind the free radicals and have beneficial effect on human body, has been increased. The wine has a dark red color. It is exquisite, full and powerful wine. The scents of the black berries, like blackberry and blueberry stand out, with the tones of cherries, dried herbs and coffee.

Alcohol content: 14.10 % Vol.

Serving temperature: 16 -18 °C

Matching with food: Beefsteaks, lamb, game meat, roasted goose or duck. It goes very well with a spicy stew and it is exquisite match with grilled tuna and ripe, hard cheese.

PACKAGING: 0,75l

VINO *od* SRCA

Široko istraživanje, zasnovano na tezi profesora Serža Renaud iz Bordoa da je procenat srčanih oboljenja drastično manji u francuskim vinskih regionima, gdje je i potrošnja vina znatno veća, donijelo je prve rezultate osamdesetih godina XX vijeka. Nekoliko francuskih instituta došlo je do sličnog zaključka: umjereno konzumiranje vina ima pozitivno zdravstveno dejstvo.

Naučna studija objavljena 1980. godine, kojom je potvrđena ljekovitost vina, bila je prvorazredna vijest u naučnom svijetu. Priča je 1991. godine dobila i naslov – "Francuski paradox" – prema nazivu emisije o ljekovitim svojstvima vina, koju je te godine emitovala američka TV kuća CBS.

Nakon višegodišnjih ispitivanja i na desetine različitih ogleda, u Plantažama je osmišljena nova tehnologija vinifikacije i 1993. na tržištu se pojavio vranac neobičnog imena – „Pro Corde“. Za srce.

Plantaže su bile jedina vinarska kuća na svijetu, koja je naučna istraživanja, zaokružila konkretnim vinom.

WINE *from* HEART

Extensive research, based on the argument of Professor Serge Renaud from Bordeaux that the percentage of the coronary diseases is dramatically lower in the French wine regions, where the consumption of wine is significantly higher, brought the first results in mid-eighties of the last century. Several French institutes came to a similar conclusion: moderate consumption of wine has positive health effects on human body.

A scientific study, published in 1980, which confirms the healing effects of wine, was the first-class news in the scientific world. In 1991, the whole story got its title-French Paradox-named after the show about the medicinal properties of wine, broadcasted by the American TV network CBS in the same year.

After multi-annual research and dozens of different experiments, a new vinification technology was designed in Plantaže and in 1993, Vranac of an unusual name –Pro Corde-appeared in the market. For the heart.

Plantaže was the only winery in the world which made a single wine upon the scientific research.

PREMIUM WINE

CRNOGORSKI VAL (EXTRA SUVO)

BIJELO PJENUŠAVO SUVO VINO

KARAKTERISTIKE: Pjenušavo bijelo vino, proizvedeno klasičnom (šampanjskom) metodom naknadne fermentacije u boci. Riječ je o jedinstvenom pjenušavom vnu, jer nastaje kao autentičan Cuvée (kupaža) šardonea i autohtone crnogorske bijele sorte krstač – koja se gaji samo u vinogradu na Čemovskom polju. Vino je kristalno čiste žuto boje sa zlatnim odsjajem. Veoma pitko i na ukusu svježe. Elegantno izbalansirano, harmoničnog ukusa i diskretno zaokruženog mirisa.

PROCENAT ALKOHOLA: 12.2 % Vol.

TEMPERATURA SERVIRANJA: 6-8°C

UZ HRANU: Ekstra suvo vino se preporučuje kao aperitiv jer sadrži manju količinu neprevrelog sécera.

PAKOVANJE: 0,75l

MONTENEGRIN VAL (EXTRA DRY)

WHITE DRY SPARKLING WINE

Characteristics: Sparkling white wine, made by traditional (champenoise) method of secondary fermentation in the bottle. This is unique sparkling wine because it comes as the authentic Cuvée (blend) of Chardonnay and autochthonous Montenegrin white variety Krstač. It is crystal clear yellow color with gold reflection. It is very potable and fresh on taste. It is elegant, harmonious and well-balanced on taste and with discreetly rounded smell.

Alcohol content: 12.2 % Vol.

Serving temperature: 6 – 8 °C

Matching with food: Extra dry wine can be served as an aperitif since it contains a small quantity of residual sugar.

CRNOGORSKI VAL (POLUSUVO)

BIJELO PJENUŠAVO POLUSUVO VINO

KARAKTERISTIKE: Nastaje kao autentičan Cuvée (kupaža) šardonea i autohtone crnogorske bijele sorte krstač – koja se gaji samo u vinogradu na Čemovskom polju. Vino je kristalno čiste žuto boje sa zlatnim odsjajem. Veoma pitko i na ukusu svježe. Elegantno izbalansirano, harmoničnog ukusa i diskretno zaokruženog mirisa.

PROCENAT ALKOHOLA: 12.2 % Vol.

TEMPERATURA SERVIRANJA: 6-8°C

UZ HRANU: Kao aperitiv ili na kraju obroka, uz desert ili zrele sireve.

PAKOVANJE: 0,75l

MONTENEGRIN VAL (SEMI DRY)

WHITE SEMI DRY SPARKLING WINE

Characteristics: It comes as an authentic Cuvée (blend) of Chardonnay and autochthonous Montenegrin white variety Krstač – it grows only in vineyard of Čemovsko polje.

Wine has crystal clear yellow color with gold reflection. It is very potable and fresh on taste. It is elegant, harmonious and well-balanced on taste and with discreetly rounded smell.

Alcohol content: 12.2 % Vol.

Serving temperature: 6 - 8 °C

Matching with food: As aperitif or at the end of the meal, with desserts or hard cheese.

PACKAGING: 0,75l

CRNOGORSKI ROSE VAL

ROZE PJENUŠAVO POLUSUVO VINO

KARAKTERISTIKE: Pjenušavo vino rose. Nastaje kao kupaz sorta caberne sauvignon i Grenache. Proizvedeno klasičnom (šampanjskom) metodom naknadne fermentacije u boci. Vino je svijetlo ružičaste boje sa bakarnim odsjajem. Izrazito voćno, sa dominantnim aromama jagode i maline. Elegantno izbalansirano, svježe i kremasto.

PROCENAT ALKOHOLA: 12.50 % Vol.

TEMPERATURA SERVIRANJA: 6-8°C

UZ HRANU: Preporučuje se kao aperitiv, ali i gaji poseban aflatitet ka suhomesnatom i dimljrenom mesu, ribljim paštetama, salatama. Odlično je i u kombinaciji sa ribljom pastetom i karpacom od gambora. Idealan pratilac blago kremastih kolača od jagode ili maline,

PAKOVANJE: 0,75l

NEW

CRNOGORSKI ROSE VAL

ROZE SEMI DRY SPARKLING WINE

Characteristics: Sparkling rose wine. It is a blend of the grape varieties Cabernet Sauvignon and Grenache. It is made by the classical (Champagne) method of the second fermentation in the bottle. The wine is light pink with the copper-like reflection. It is very fruity with prevailing aromas of strawberry and raspberry. Elegantly balanced, fresh and creamy.

Alcohol content: 12.50% Vol.

Serving temperature: 6 – 8 °C

Matching with food: It is recommended as an aperitif and also matches perfectly with dried and smoked meat, fish patties and salads. It also goes superbly well with a fish patte and shrimp carpaccio. It is ideal with the lightly creamy pastries with strawberries or raspberries.

PACKAGING: 0,75l

VINSKI PUT

Vinski putevi, najčešće, obuhvataju staze i predjele, kulturu i običaje, vino i gastronomiju u određenom vinskom regionu. Rijetkost je, međutim, da čitavo jedno podneblje doživite u okviru samo jedne vinarske kuće, a upravo to vam omogućava specijalni program vinskog turizma "VINSKI PUT", koji organizuje vinarija "13 jul Plantaže".

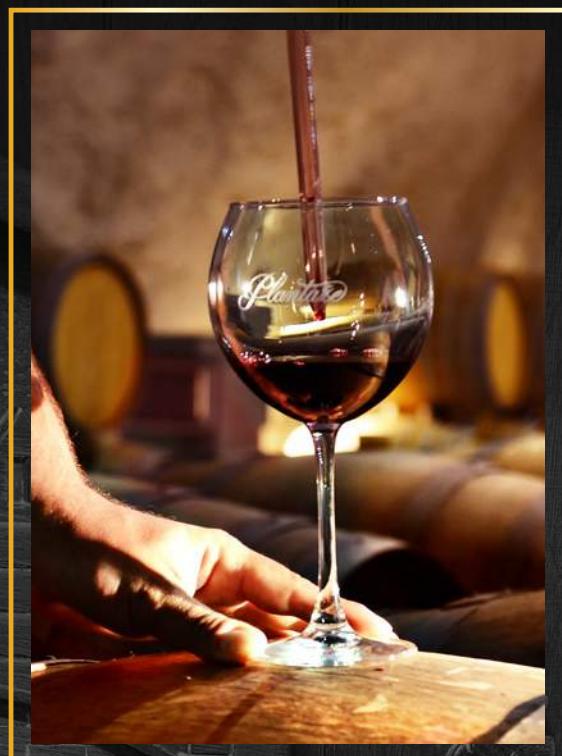

U okviru različitih tematskih programa, vodimo vas kroz tri različita podruma, kroz vinoteke i restorane "Plantaže" – kroz autentičan svijet mirisa i ukusa crnogorskog podneblja. Doživite impresivni ambijent jedinstvenog vinskog podruma u Evropi, uživajući u nezaboravnim mirisima i ukusima – u "bukeu" našeg podneblja. Izaberite program posjete, otkrijte autentičan svijet naših autohtonih sorti vinove loze i vina, našu posvećenost, tradiciju, našu filozofiju vina i zaplovite kroz more našeg vinograda na nepreglednom Čemovskom polju u kojem caruje vranac – nacionalni ponos Crne Gore.

WINE ROUTE

Wine routes, most commonly, include paths and areas, culture and customs, wine and gastronomy in a specific wine region. It is a rarity, however, that entire area is experienced within only one winery, and this is exactly provided by special program of wine WINE ROUTE, organized by winery 13.jul Plantaže

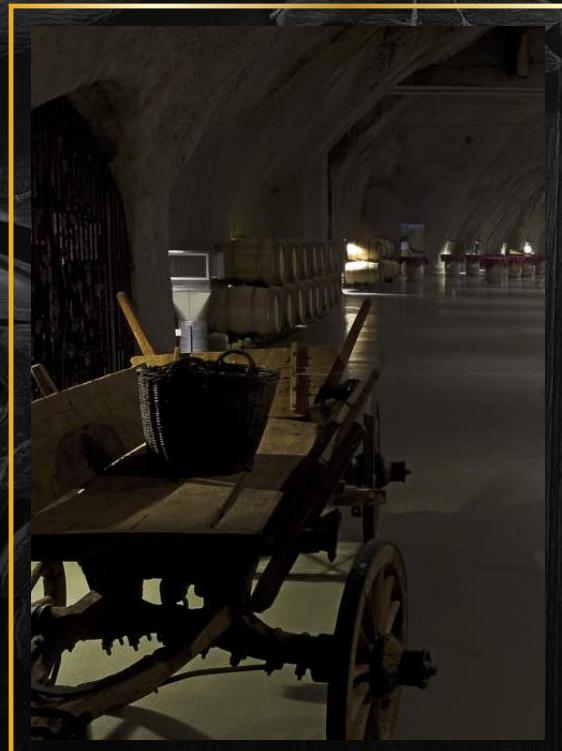

Through different thematic programs, we take you through three different cellars, wine boutique and restaurants of Plantaže – through one authentic world of aromas and flavors of the Montenegrin area. Feel the impressive ambience of the unique wine cellar in Europe, enjoying an unforgettable scents and tastes – in "bouquet" of our region. Choose the visit programme, discover the authentic world of our autochthonous varieties of grapevine, our commitment, tradition, our wine philosophy and sail the sea of our vineyard in the immense Čemovsko polje, reigned by the Vranac – the national pride of Montenegro.

Plantaže

THE WINES WORTH BELIEVING IN

The Montenegrin company 13. jul Plantaže represents one of the greatest and most important producers of grape, wine, and grape Today, Plantaže owns and manages the vineyard covering 2 310 ha, with three wine cellars with the capacity of 310 000 hl, nursery of rootstocks on 40 ha, peach plantation covering 85ha, fish pond producing 100t of California trout annually, as well as different retail and catering facilities. The company performs in accordance with the International Standards of quality ISO 9001, 14001, 2200 and HACCP, with the annual production about 22 million kilos of wine grapes, launching cc 17 million bottles into the markets and cc 2000 tons of the grapes for fresh consumption into more than 35 countries worldwide.

The wines of Plantaže have won more than 800 awards at wine contests, competitions and fairs worldwide.

Nowadays, Plantaže has been one of the most successful Montenegrin companies ever and it's 661 employees follow not only a half of the century tradition of "Plantaže", but also one thousand long Montenegrin tradition of viticulture and wine making. It devotes its greatest attention to Montenegrin autochthonous grape varieties and authentic Montenegrin wine, expressing the Montenegrin culture and the spirit of a really unique viticulture and winemaking terroir.

THE POWER OF TERROIR

Wines of the company Plantaže testify of unique Montenegrin area, located among the Adriatic Sea and Lake Skadar and high mountains, the location that provides conditions for creation of authentic, unique and opulent wines.

Generally, Montenegrin viticultural region is located on the southernmost part of the Adriatic coast, so the proximity greatly influences microclimate of Ćemovsko polje. The impact of the Adriatic climate spread across the wide valley of the river Bojana as far as Podgorica and our vineyards in its vicinity.

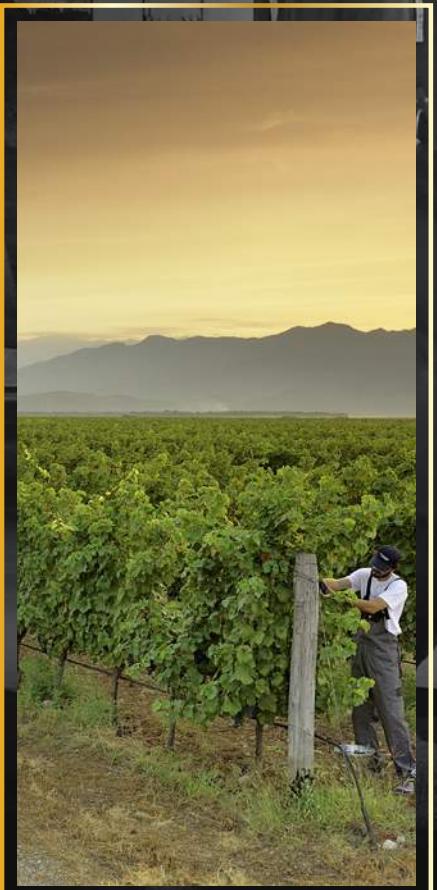

We believe that the wines are "the children of the terroir", their character and quality originating directly from the vineyard. That is why we have been committed to the production of wines which may express their origin to its full extent. Thus, everything we do in the vineyards and in the cellars, we do with great respect towards our land, our vineyards and the grapes the vines give us.

This is the reason why we have managed to craft the best Montenegrin wines for over fifty years – the wines of distinctive character with powerful hallmark of our region.

THE SECRET OF ĆEMOVSKO POLJE

Vineyard Ćemovsko polje is located southeast from Podgorica, between the rivers Morača and Cijevna. It covers the area of 2,320ha which makes it the largest vineyard in Europe in a single complex with more than 11.5 million vine plants. Vineyard is located on the plateau with the altitude, ranging from only 45 to 70 meters, surrounded by range of limestone hills, which defined it as karst valley with extremely hot and dry summers and winters only slightly cooler than the coastal zone. The precipitation amounts only about 1.600 ml of water residue per month.

Extremely small precipitation and significant number of sunny days, complete the image of this region all in the colors and sounds of hot summer. Another challenge this vineyard faces is the soil, hard and skeletal, made of limestone scattered with sand and gravel, with many polished pebbles. It is from this epic battle of the vines and the rock that our authentic wines of the unique, luscious bouquet originate, testifying of the distinctiveness of the vineyard they come from.

Plantaže

MONTENEGRIN AUTOCHTHONOUS VARIETIES

Thanks to the extraordinary area, soil composition and favourable position, both autochthonous grape varieties - Vranac and Krstač as well as the international, famous grape varieties such as: Chardonnay, Sauvignon Blanc, Cabernet Sauvignon, Merlot, Negro Amaro, Marselan, Petit Verdot, etc, have been successfully grown in the vineyards of Plantaže.

Vranac is an ancient Montenegrin variety and its real origin is hidden deep in history. Vranac is the prince of the magnificent royalty of wines in Čemovsko polje. It is our viticultural and national pride and accordingly is covering even 70% of the vineyards.

Krstač is grown on the micro locality of Nikolj Crkva, and all attempts to grow in other world areas failed. The cluster is the medium size, compact, resembling the cross after which it got its name. Plantaže is the only winery in the world growing Krstac and producing the wine with the same name.

TREASURY OF WINES

Primary production is organized in the wine cellar Čemovsko polje, with the state-of-the-art equipment and application of the latest technological achievements. The oldest cellar – Lješko polje, is transformed into the cellar the aging of special lots of wine, as well as for the experimental vinification.

The old military airport was transformed into an impressive wine treasury in 2007, based on château concept, as the cellar is located in the middle of the vineyard, in the same soil, in the same rock where the vine was born. The cellar is built at the average depth of over 30 meters below the ground level. It has the form of spiritual tunnel, 356 meters long, of average width 13,5m and height 7 meters. Humidity – 70 to 80%.

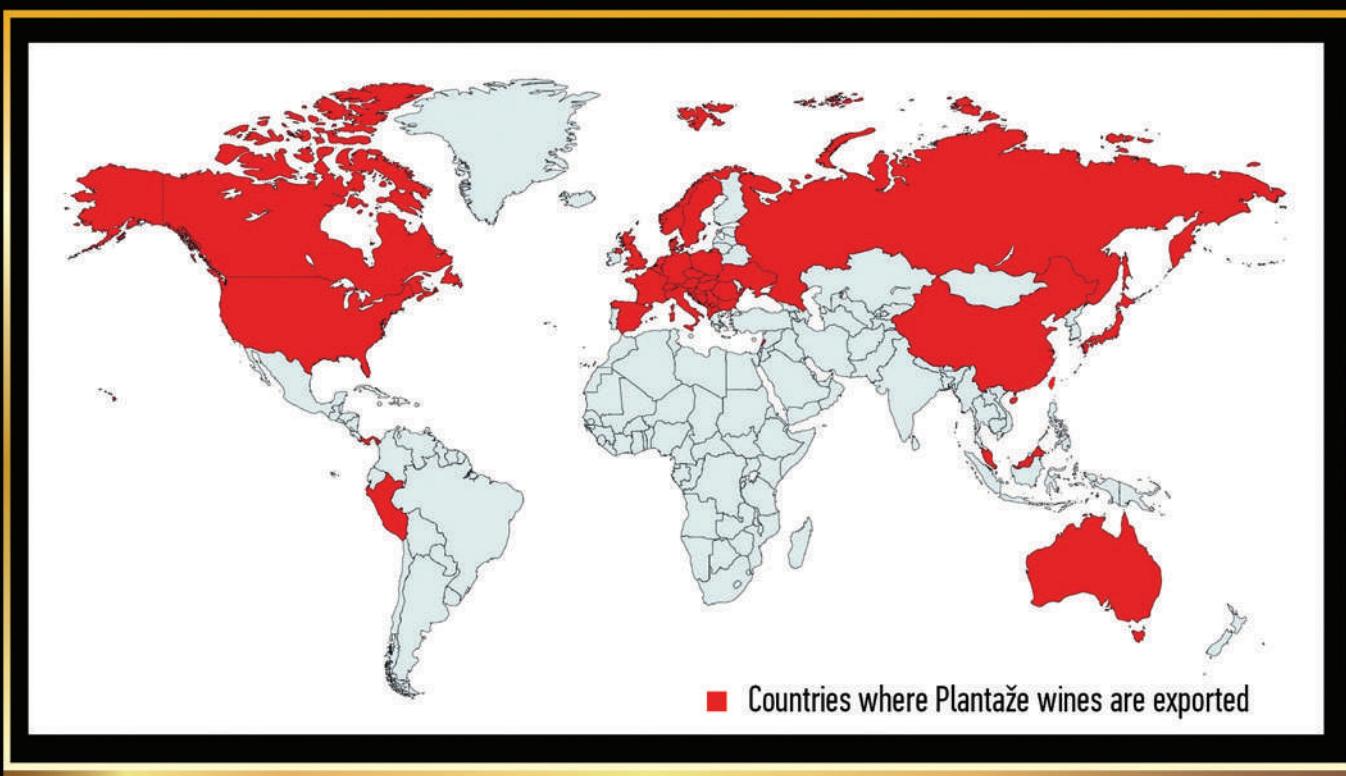

It is in the impressive space, covering 7.000m² that the wine has been tended in the wooden barrels, in the perfect climatic and technological conditions. In the wooden barrels 2 million liters of wine have been stored, lying down and aging.

WINES THAT WON THE WORLD

Plantaže exports wines to 43 countries of the world with the sales of about 14,5 million of bottles or about 60% of the total annual production. From Far East, via Central Europe to Far West, Plantaže is one of the few companies in the world, the wines of which may be found in almost all continents. Besides their share in big trade chains worldwide, Plantaže wines are present in the wine list of some of the most exclusive world restaurants.
